YOSSI DANIEL

Data Analyst | Advanced SQL · Python · Product & Growth Analytics
053-244-3982 | yosidan1100@gmail.com | LinkedIn Profile

SUMMARY

Data Analyst with almost 5 years at Pontera, a fintech company serving retirement accounts, and hands-on analytics experience since January 2024. Expert-level advanced SQL and practical Python (Pandas, NumPy) on large, complex datasets; I build KPI dashboards, investigate acquisition/ops funnels and discrepancy trends, and partner with Product and engineering. Built production LLM-based AI agents (prompt engineering, LLM output evaluation). BA in Economics (Tel Aviv University) and Certified BI Developer (Technion); fluent English.

PROFESSIONAL EXPERIENCE

Pontera (fintech, retirement accounts)

Algorithmic Data Researcher (Data Analyst) | 2025 – Present

- Analyze and validate large custodial datasets with advanced SQL and Python (Pandas, NumPy), writing systematic validation rules that cross-reference account snapshot attributes and eliminate data discrepancies.
- Research complex reconciliation algorithms and evaluate their computational efficiency, moving problematic customer holdings into successful automated reconciliation and improving data integrity across retirement accounts.
- Designed, built and deployed production LLM-based AI agents that automate exception analysis; I write the prompts and evaluate and validate LLM outputs, replacing manual analysis protocols.
- Write engineering specs and scope developer tasks for new automation tools and enhancements to existing engines, including components for tracking historical changes, resolving canceled data inputs and aligning indexes.

Senior Financial Operations Analyst, Data & Analytics | Jan 2024 – 2025

- Built and maintained KPI dashboards that turned dense custodial transaction logs into clear metrics and interactive summaries for stakeholders.
- Built SQL-based diagnostic logic that replaced manual account audits with automated exception processing for large enterprise portfolio data flows.
- Led review cycles with R&D and engineering leads to align system logic and remove operational blockers, and trained team analysts on system configuration.

Financial Operations Analyst | 2022 – Dec 2023

- Audited account transactions, contribution balances and historical ledger movements to trace discrepancy trends and keep financial data aligned.
- Built Excel and SQL mappings that matched asset categories against raw reporting statements, keeping onboarding metrics accurate during periods of high account growth.

SKILLS

Data analysis: Advanced SQL (CTEs, window functions, joins, query optimization) on large-scale datasets; Python (Pandas, NumPy)

BI and visualization: Power BI, advanced Excel; executive-level KPI dashboards

Automation & AI: LLM-based AI agents, prompt engineering, LLM output evaluation; automated exception processing

Domain: fintech, financial transaction data, portfolio data normalization, ledger reconciliation

EDUCATION & LANGUAGES

Tel Aviv University, BA in Economics | 2019 – 2022

Technion – Israel Institute of Technology, Certified BI Developer | 2023 – 2024

Languages: Hebrew (native), English (fluent)
